As soon as you could please. We're trying to award the work and have one bidder offering to do it themselves and another we would have to provide for, so the cost and timing are critical considerations.

Thank you.

We would have to develop several spec sections, add more details to the drawings, and probably add a site visit to evaluate the soils and steel sets. Around CBI/Ex. 4 might be a good guess for the probable cost.

Subject: Gold King guidelines upgrade

Do you have an estimate for how much effort (and \$) would be required to turn your guidelines into something with a PE stamp for ground control? The question arises because one of the bidders has pointed out that OSHA excavation standards require stamped drawings when anything other than a manufactured trench box is used to support soils for worker protection.
